WELL INVESTIGATION PROGRAM—HYDROGEOLOGIC INVESTIGATION AT ITT  
AEROSPACE CONTROLS, 1200 S. FLOWER ST., BURBANK, (FILE NO. 109.0582)

ITT Aerospace Controls has been directed by Regional Water Quality Control Board staff to implement a hydrogeologic investigation of the ground water quality underlying their site. As part of an on-going investigation, off-site ground water monitoring wells are required to be installed. It is our understanding that three of the proposed off-site ground water wells are located on City of Burbank properties and the permits for these wells must be obtained through your agency prior to their installation. Installation of these monitoring wells are an integral part of ground water assessment and remediation efforts within this EPA Superfund area. Your corporation to expedite the review and issuance of the necessary permits will be greatly appreciated.

If you have any questions, please contact Ms. Ana Veloz at (213) 266-7590.

GREGG KWEY  
Senior Water Resource  
Control Engineer
